## When should you use the Multifunction Column Guard?

«The modular design allows for quick installation and easy repairs while ensuring a tight fit to save space. These guards are built to stop vehicles like forklifts, protect columns, and withstand heavy use. At the end of their life, they can be easily and quickly disassembled, and materials separated for sustainable disposal.

## Flexible protection for columns and pillars

The Multifunction Column Guard is designed to protect large building columns and pillars from impacts caused by forklifts and other material handling equipment.

Finish off the installation with **adjustable straps** to keep the guard secure.
